Aluminum Oxide: Most popular and durable. Universally used for metals, wood, plastics.

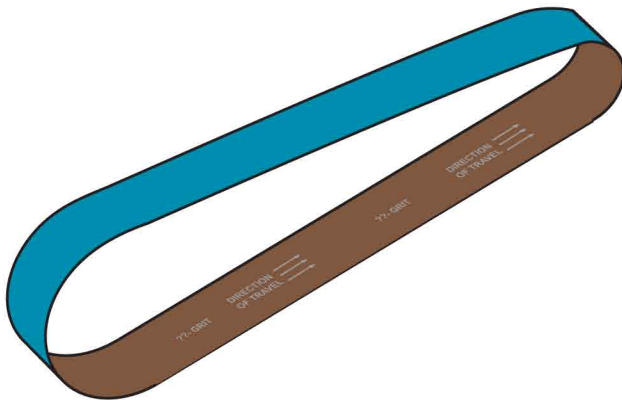

ZIRCONIA ALUMINA

D107Z-036

D107Z-060

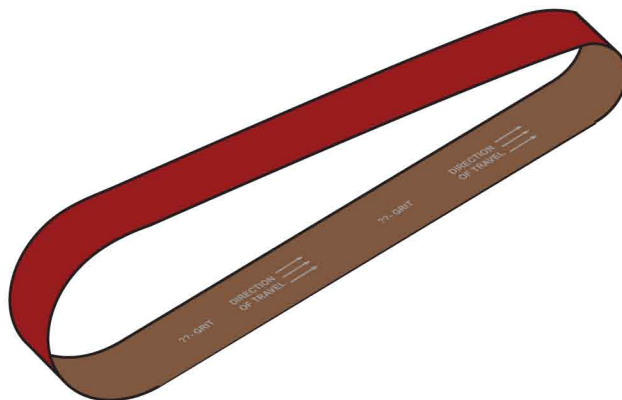

D107Z-080

D107Z-120

Zirconia Alumina: A synthetic grain engineered with fracturing properties to ensure a consistently sharp edge. Used for grinding and deburring metals

SPECIAL ORDER

Ceramic: A synthetic grain formulated to withstand extreme pressures and dissipate heat. The synthetic chrystals fracture to continually expose sharp edges for aggressive cutting action. Specifically for grinding metals including stainless steel.
